

Product Delivery Inspection (PDI) Protocol

MODEL	SERIES NO.	PURCHASE DATE	INVOICE DATE	SOLD BY

PRE-DELIVERY CHECKLIST

Verify completeness of product (if applicable):

- Tiller / throttle
- Battery SOC above 10% (otherwise recharge)
- Propeller / anode set
- Charger
- Fin (if not integrated in motor)
- Protective covers (e.g. battery charge socket, tilt lever)
- Documentation (manual, warranty card)
- Cables (Cruise models, Power batteries)
- Electronic box (only Cruise 12.0 FP models)
- Emergency kill switch (magnetic key)

Visual inspection for defects and cleanliness:

- No broken parts, scratches and cuts
- All components are clean
- All Torqeedo stickers (such as "C6.0", "XP", "Torqeedo") are complete and present
- Clamp bolts of transom mount are greased
- All screws are tightened
- No liquids leaking from product
- No damages of any display screens (tiller, remote throttle)
- All electrical connections undamaged and clean
- All serial number labels present and undamaged (motor, battery)

Check during operation (if applicable):

- Is the pylon aligned with the head of the motor?
- Is transom bracket functional so that motor can be mounted?
- Does the motor tilt function work (manual / electric)?
- Can the motor be turned on and off by pressing power button?
- Do all buttons on tiller/remote throttle work?

- Does motor go in forward, reverse and stops in neutral?
- Is the propeller shaft bent and propeller wobbles due to damage?
- Is there an unusual noise when operating the motor?
- Does the motor stop when the magnetic key is removed?
- Does the battery charge using the corresponding Torqeedo charger?
